Saturday, May 2nd.

Today the weather is sunny and warm. I went to America with my family. First, I went to the White House. There were a lot of people in it. We took some photos. It was exciting. In the afternoon, I went to an art museum. It was so big. I like it because I saw some symbols of America. For dinner, we have some salad and beef. There was delicious pizza also, but I don't like pizza.

I was so tired but excited.

At noon, I eat lunch with my classmates. My father and my mother have lunch in their canteens.

In the evening, I come back home from school, then I do my homework. My father and my mother come back home from work. They arrive home at half past six. We eat dinner together.

At night, I read my newspaper, then I go to bed. My father often goes to walk, but my mother usually does the household.

Today I am here to tell the world about a true hero of China.

Known as the "father of hybrid rice," Yuan Longping who grows the world's first hybrid rice strain, which has made a dream that all Chinese have enough food to eat become a reality. He has dedicated his entire life to the hybrid rice technology. The yield of hybrid rice has continued to set new records, from 300kg to 500 kg, and then 1000 kg per mu. His hybrid rice has been grown in Africa, America and Asia.

But on May 22, the great scientist passed away at the age of 91. This ordinary but great man not only helped China but also made important contributions to global food security.

I believe he will be remembered by the world.
