

"Experienced" doesn't Mean "Best"

指导老师 南专库

At the beginning of human history, people always believed that experience was very important. It controls our mind and leads our body to do the right thing. If we don't have any experience with something, we won't do it well. In that sense, we are lucky enough. There have been a lot of pioneers. They set a fire and lit the road in front of us. But is it right?

Rational thoughts always strangle emotional imaginations. "Experienced" doesn't mean "Best". For example, a turtle loves the dance of a centipede. And he asks the centipede: "When you dance, do you first step with your 37th left foot or your 38th right foot?" The centipede tries again and again. Finally, he can't dance anymore because he thinks about the action of his feet all day long.

Be careful of authority. New progress is usually made by young people. Almost every famous scientist bore fruit when they were young. We should respect authorities and experienced people. But it doesn't mean we should believe in them forever. Art, literature, treasures in our history, not only need rational thoughts, but also require emotional imaginations. Even math and science also need bold guesses. In fact, only when we combine rationality and emotion, will our thoughts be sparkling in the starry sky, and never die.

My Favourite Festival

鄞州区德培小学 504 班
舒诗云(证号 2219721)
指导老师 朱意娜

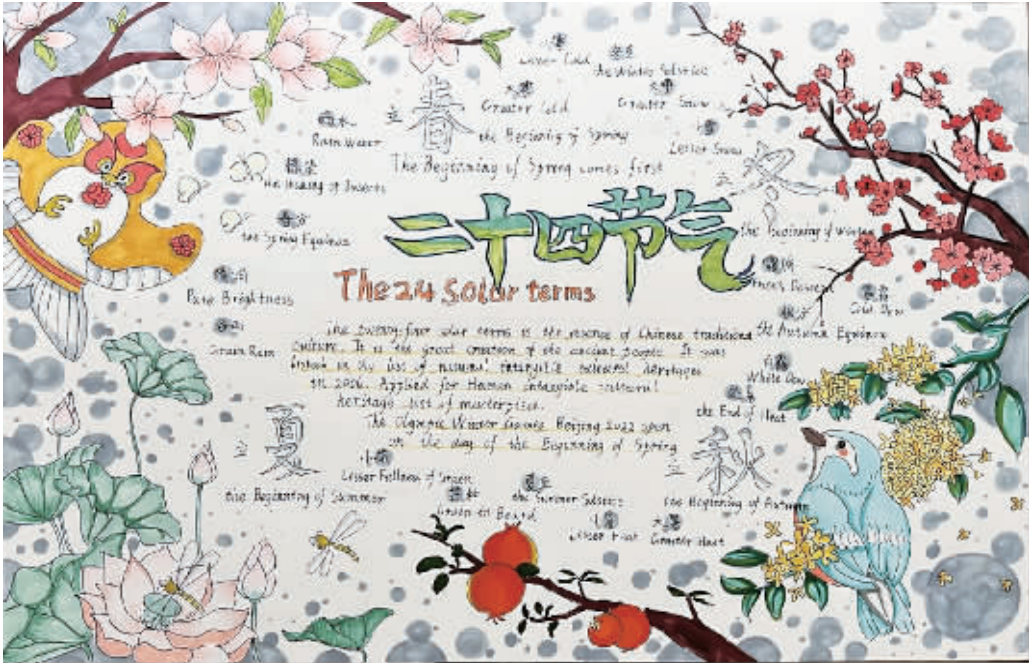

My favourite festival is Mid-Autumn Day. It's usually in September or October. I am very happy on the day. Because we'll have a big party.

In the party, I can have a big dinner with my family. Then we will enjoy the full moon, eat moon cake and watch TV. The Moon cake are very delicious and sweet. In the evening, I can fall asleep by the yellow moonlight. I love Mid-Autumn day. It's meaningful and joyful!

Summer

My father and I often play table tennis together.

My mother and I usually play badminton together.

My grandmother and I sometimes play with cards together.

My grandmother and I sometimes watch TV together.

How happy we are!

Useful Sunlight Energy

鄞州蓝青小学 503 班
胡凌涵(证号 2204764)
指导老师 徐翠玲

The sun looks far away from us, insignificant, but it is very important for us. The sun has many good advantages. For example, we can use sunlight energy as electricity. In China, the electricity that people use in 2020 is fifty times more than the amount in 1960. So, we need to find other types of energy, before we outrun the resources we can currently use.

People have started using sunlight rays in their daily life, by using UV equipment. Swedish company DUG made a sunlight lamp. You need to put a solar board on top of the rooftops. Then, we could use it. We don't need to use any other original electricity. You can also use sunlight fridge, sunlight air conditioning... In the UN, sunlight energy's price is only 1/60 of the original energy price. And the contamination that original energy makes is 20 times more than sunlight energy! In Tokyo, Japan, there is a sunlight energy station. It can make 2,500,000 degrees of electricity per day. It is very high. Japanese government wants to build more sunlight stations like the ones in Tokyo. Other countries should follow Japan's example.

If we keep using the electricity at the same speeds we are using now, by 2190, we would not have enough energy! So, we need to build more sunlight stations in other urban areas like Tokyo, if we want to keep using air conditioners in the future. However, it won't be easy. Each sunlight station costs about 20 million dollars. Some small and poor countries can not afford it! Let's help each other choose to be good.

The Best Place to Go to

慈溪实验中学初二(3)班
徐柏涛(证号 2201741)
指导老师 南专库

Cixi City Library is the best place to go on weekends. I usually finish my breakfast the fattest on Saturdays because I want to go to the library the first. The library is the most crowded place on weekends because many students study and do homework.

Some people think they are boring but I think they are the most hard- working students. The place where you can enjoy your time is the Reading room. You can read books and listen to music there. If I go to the library, I will feel joyful because I will have a good time there.

My Dream School

指导老师 陈薇薇

This is my dream school. It's in the sky. It's small but magic. Look, this is the playground, and it is big. We can play football on the playground. Where is the classroom? It's next to the teachers' office. We can climb up to the clouds and have classes there. That is the art room. We can draw in it. Wow, the school can move. How cool!

My School Life

指导老师 曹春琴

I'm Annie. I'm a student in Grade 5. My school is small but beautiful. My school life is colourful. We have 6 classes every day. I love PE best. Because I can play football with Mr Xu and my classmates in PE class. In our school, there is a nice park, too. We often play games after class in it. There is a nice pond and there are some fish swimming in it. I like my school life. What about yours? Can you tell me something about it?

唐晨越(证号 2213565)
指导老师 王洁琼

I have a happy family which has three people, my dad ,my mom and me.

My father works in a company which isn't far away from home. I think he's an understanding dad who is strong and fat. Eating delicious food is his favorite. So how to lose weight is the biggest problem for him.

My mom looks like a young girl who is quite pretty and thin. She works in a bilingual kindergarten which is big and beautiful. She is good at dancing and cooking.

I'm a handsome boy who is smart. Playing basketball is my favorite, because I like Kobe Bryant and Michael Jordan.

What a super family! I love it so much!
