There are all kinds of shops in our city. They can meet your various needs. My favourite place is Wanda plaza. I usually go there once every month.

People in Ningbo are also very civilized. They take Ningbo as their own home. They get along well.

I have a wildest idea. People will live on Mars in the future. You must be curious , "How does this be done?" Please listen to me .

In the future, geologists will invent superbugs, and we will put them in the soil of Mars. Then these super bugs will change the atmo-sphere of Mars, and we will have oxygen. What ’ s more, we will plant vegetables and fruit and we can bring animals to Mars. At that time, Mars will become our back garden. People can travel to Mars in spaceships.

Meals are very important in our lives. Everyone has three meals every day. So do I. I always drink a cup of milk and eat one egg for breakfast. Sometimes I eat noodles. I usually eat rice, vegetables and meat for lunch. What else? In the evening, I have rice for dinner. Sometimes I drink some-thing for dinner.

How about the three meals of you?

What ’ s the future like? I believe it will be a high- tech era. Everyone will feel safe and happy all the time.

Mum doesn ’ t have to worry about my health. The AI- bed will check my body every day. The AI- lamp can protect my eyesight. If any-one is sick, the robot at home will be a good doctor. So, the virus will no lon-ger be a threat to human beings. There is no need to wear a mask any more, and we can breathe the air freely.

What ’ s more, we will not be afraid of traffic jams. Everyone will have a spaceship. Just push the but-ton, and it can take us to where we want to go. So no one will lose life be-cause of a traffic accident or an air crash.

Thanks to the high technology, we have more time to enjoy our life and make the world a better place.

Do you like cats?

One day, my mom's friend gives us a cat called little seven.

Little seven is very lovely. Her hair is white. And there is a lit-tle brown on it. When she sits down, her body looks very fat and interesting.

If I open her door, she certain-ly runs to the rats ’ cage quickly, and pulls the cage. But for a long time, she knows that she can't open the door. So, she sits in front of the cage and looks at the rats, but the rats don't have any time to play with her. They are eating, sleeping, and playing, like the cat doesn ’ t exist.

What a lovely cat! Do you like cats now?

Our life in 2100

What will happen in our life of 2100? We don ’ t know now, but I think it will be computer world. In that world, the things will be cy-bernated. It will be very in-teresting.

Firstly, we need not go to school, office, hospital... The robots can do every-thing we want to do, just like cooking, teaching and cur-ing. It will be very easy.

Also, the electronic products are better. We can play computer games, watch TV everyday, but we can ’ t be short-sighted.

Finally, our furniture will not be old and ugly, and it will be very beautiful and modern. Besides, we can control them by voice.

That is what I imagine our life in 2100. I think it will come to true. What do you think?
